

Key Features:

- Designed specifically for pipe applications with shielded outing to block electromagnetic interference. Identifies water presence along its entire length
- 4 core tape designed for water leak detection Includes fault detection, indicating incorrect wiring or faulty cable
- The CGSSPLRP cable is compact yet robust, displaying high resistance to abrasion and corrosion
- Features a sleek design that facilitates quick drying Comes in factory-terminated lengths with pre-installed connectors,available in various lengths.

Product Overview:

The CGSSPLRP 4-Core Shielded Water Leak Rope is a rugged, compact water leak detection cable engineered specifically for pipe installations. Featuring a shielded outer layer, it blocks electromagnetic interference, enabling reliable detection of moisture along its entire length. This 4-core sensing tape also includes built-in fault detection to alert you to wiring issues or cable defects. The design resists abrasion and corrosion and dries quickly, and it comes factory-terminated with pre-installed connectors in various standard lengths (e.g., 16 ft, 32 ft, 65 ft) or customizable lengths.

Sizes Available:

Part Number	Length (FT)	Description
CGS-SPLRP-16	16	16FT Sensing Cable w/ 5ft Lead Cable
CGS-SPLRP-32	32	32FT Sensing Cable w/ 5ft Lead Cable
CGS-SPLRP-65	65	65FT Sensing Cable w/ 5ft Lead Cable
